

Advanced Technology. Better Outcomes.

Saint Alphonsus Comprehensive Breast Care Center is specifically designed to care for a woman's comprehensive breast health. We offer a full range of breast cancer prevention and screening tools, along with state-of-the-art diagnosis and treatment options:

- Screening & diagnostic mammography
- Diagnostic ultrasound
- High-risk assessment
- Genetic counseling
- Clinical breast exams
- Education and counseling
- Ultrasound-guided breast biopsy
- Fine-needle aspiration
- 2D & 3D Stereotactic breast biopsy
- Pre-op lesion localizations
- Second opinion consultations
- Breast Nurse Navigator
- Patient Family Advisory Counsel & Support Group

3D Mammography is a new screening tool that allows doctors the ability to examine breast tissue one layer at a time and:

- finds cancers earlier than 2D mammography alone
- provides a 27% increase in cancer detection and a 40% increase in invasive cancer detection
- reduces "call-backs" by 20-40%

Partial breast radiation using

Brachytherapy allows a more directed dose of radiation and reduces the normal course of radiation for women with early-stage breast cancer by 83%, from 25-30 days of treatment down to only 5 days.

The best kind of breast care is

designed to detect cancer at its earliest, most treatable stage, and is easy to access. That's why Saint Alphonsus offers the latest in breast cancer screening technology and is supported by a team of breast health experts who treat you with compassion and respect.

From the latest digital mammography technology and advanced tools like 3-D mammography, which allows doctors to view dense breast tissue in a way never before possible, to the latest in breast surgery, reconstruction and cancer care services, Saint Alphonsus offers unparalleled care to accurately diagnose and effectively treat breast cancer. And with five Breast Care Centers and two mobile mammography coaches that travel across the region, you'll have access to care that is not just comprehensive but convenient.

Because the best kind of care is **all about you.**

All about . . .

Strength & Expertise

If you have been diagnosed with breast cancer or have been told that you might have breast cancer, you will be referred to a surgeon. At this point in time, you want an experienced surgeon who offers leading-edge expertise in breast surgery techniques and works together with a team of experts for the best outcome possible.

At Saint Alphonsus, we recognize that dealing with breast cancer can be an emotional and stressful situation for many women. That's why you want an experienced surgeon with unique insight, looking for ways to preserve both your health and your breasts.

Elizabeth Prier, MD, Medical Director of Saint Alphonsus Comprehensive Breast Surgery, specializes in breast cancer surgery and is Idaho's only fellowship trained breast surgeon.

As Director, she leads in a strong team approach, combining the skills and experience of other outstanding surgeons, radiologists, oncologists and clinical staff - meaning that each patient benefits from a wide range of expertise. Having highly-skilled representatives from many different disciplines involved in your individualized care ensures you receive the **best possible treatment**.

Saint Alphonsus Women's Specialty Care Center

900 North Liberty, Suite 101 | Boise, ID 83704-0109 | 208-302-2200

Linsey Etherington, MD, is a Plastic and Reconstructive Surgeon who has completed advanced training in the latest plastic surgery techniques and works in close collaboration with Dr. Elizabeth Prier, offering breast cancer patients **immediate** reconstructive surgery.

Dr. Etherington is highly skilled and provides leading edge expertise in plastic and reconstructive surgery, offering a wide range of services including:

- Breast surgery and breast reconstruction
- Facial reconstruction
- Trunk and extremity reconstruction
- Wound healing
- Pediatric plastic surgery
- Flap surgery

Patrick Connor, MD, is a Gynecologic Oncologist trained in advanced surgical techniques including daVinci Surgery.

In addition to working at the Women's Speciality Care Center in Boise, Dr. Connor sees patients in Nampa, Caldwell, Ontario and Baker treating the following conditions:

- Cervical cancer
- Ovarian, falopian tube and primary peritoneal cancer
- Uterine cancer
- Vaginal cancer
- Vulvar cancer
